EDUCATION

The University of Texas at Dallas Bachelor of Science | Computer Science

May 2028

Honors: Academic Excellence Scholarship

WORK EXPERIENCE

Basics - Founder & CTO; San Francisco, CA

January 2026 - Present

Self-hosted company operating system replacing fragmented SaaS tools with a unified workspace for early-stage startups

- Architected a self-hosted startup operating system in Next.js, TypeScript, Node.js, PostgreSQL, Docker, and AWS, unifying CRM, projects, documents, analytics, and automations.
- Designed multi-tenant RBAC, event-driven workflows, real-time data synchronization, extensible API integrations, and containerized deployment for secure customer-managed environments.
- Converted insights from 50+ founder interviews into a three-pillar technical roadmap; launched four paid pilots in 20 days and supported a \$1M pre-seed raise at a \$10M valuation.

Speakl Inc. - CTO; Frisco, TX

June 2025 - Present

AI communication platform delivering multimodal feedback for public speaking and interview performance

- Architected a React and FastAPI platform serving 1.5K lifetime users and 300+ monthly active users through custom computer vision, audio, and NLP pipelines.
- Engineered AWS infrastructure processing 15K+ monthly API requests at 99% uptime using S3, DynamoDB, IAM, auto-scaling, and CloudWatch monitoring.
- Led four engineers, implemented CI/CD and code-review standards, and shipped 50+ production deployments while processing 500+ hours of speech across 10+ feedback metrics.

ACM Research - Head Researcher; Richardson, TX

September 2024 - December 2024

AdFusion research project applying generative AI to automated advertisement creation

- Fine-tuned Stable Diffusion and large language models on 5,000+ ad images using preprocessing, augmentation, and output-validation pipelines.
- Built Python and Selenium scrapers collecting 3,000+ ads from 10+ platforms with 95%+ consistency through deduplication and robust error handling.

TikTok - UGC Ad Creator; Remote

March 2024 - March 2025

Short-form performance creative for consumer brands and platform campaigns

- Produced 50+ UGC ads generating 2M+ impressions while applying platform-policy, content-risk, and data-handling requirements.
- Collaborated with 5+ brand partners to align creative deliverables with campaign KPIs and tight production timelines.

iTallentii Tech - Software Engineering Intern; Frisco, TX

November 2022 - January 2023

Software development internship focused on data collection, API integration, and full-stack reliability

- Developed JavaScript and Node.js web-scraping pipelines across 20+ public sources, reducing manual data collection time by 80%.
- Integrated a React front end with RESTful Node.js APIs and fault-tolerant error handling to improve reliability across user workflows.

PROJECTS

PlayAI | C#, Python, Unity

GitHub

- Built an AI tool that converts a text prompt into a playable Unity 2D game by generating scripts, textures, and assets automatically.
- Orchestrated a C# Unity runtime with Python generation pipelines to create executable gameplay logic and scene assets from a single prompt.

ClipThat! | Swift, Xcode

App Store

- Shipped a privacy-first iOS app that continuously buffers on-device audio and saves the prior 30-60 seconds with one tap and zero cloud storage.
- Designed a rolling local audio buffer and persistence workflow so users can recover recent moments without continuous cloud recording.

Social Media Lens | Python, Flask, Selenium, Gemini

Bank of America

- Built an AI web app that aggregates public social posts by topic and timeframe, then analyzes trends and sentiment through automated pipelines.
- Automated Selenium ingestion and Gemini-based classification across user-selected topics and date windows for repeatable analysis.

Q Bot | Node.js, JavaScript, Discord.js

GitHub

- Built a Discord bot integrating voice recognition and command handling to automate actions in live voice channels.
- Implemented an event-driven Node.js command architecture for reliable, low-latency bot interactions and extensible feature development.

ADDITIONAL INFORMATION

Languages: Python, Java, JavaScript/TypeScript, C#, Swift, C/C++, SQL

Frameworks & Cloud: React, Next.js, Node.js, FastAPI, Flask, PyTorch, Selenium, AWS, Docker, PostgreSQL, DynamoDB, S3, Supabase, Firebase

Tools: Git, CI/CD, Postman, Figma, Jira

Certifications: Certiport Certified in Java, JavaScript, and Network Security
